

**Mopani District  
Municipality**

## **MEDIA RELEASE**

**DATE: 23 OCTOBER 2018**

### **WATER SUPPLY DISRUPTIONS IN GIYANI.**

The provision of water in the town of Giyani and its sections has been disrupted due to a damaged booster pump. The booster pump is connected to a main pipe line that is abstracting water from the Nsami Dam to a reservoir in Giyani. The Mopani District Municipality's technicians who have been deployed in the area are working tirelessly to ensure that the booster pump is repaired and that normalcy is restored. The situation mainly affects high lying areas such as the Giyani town, section E and F. Our analysis also identified aging water infrastructure as one of the contributory factors to consistent water cuts in Giyani. We are urging residents who are still receiving water in their households to use water sparingly. The district municipality is also looking at a possibility of deploying water tankers to the affected areas to supply water as a temporary measure.
